## Office Action Summary

Application No.

09/715,438

Applicant(s)

GARAKANI ET AL.

Examiner

Arrienne M. Lezak

Art Unit

2143

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --  
Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

### Status

- 1) ☐ Responsive to communication(s) filed on \_\_\_\_.
- 2a) ☒ This action is **FINAL**. 2b) ☐ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

### Disposition of Claims

- 4) ☒ Claim(s) 1-3,5-16 and 18-20 is/are pending in the application.
- 4a) Of the above claim(s) \_\_\_\_ is/are withdrawn from consideration.
- 5) ☐ Claim(s) \_\_\_\_ is/are allowed.
- 6) ☒ Claim(s) 1-3,5-16 and 18-20 is/are rejected.
- 7) ☐ Claim(s) \_\_\_\_ is/are objected to.
- 8) ☐ Claim(s) \_\_\_\_ are subject to restriction and/or election requirement.

### Application Papers

- 9) ☐ The specification is objected to by the Examiner.
- 10) ☐ The drawing(s) filed on \_\_\_\_ is/are: a) ☐ accepted or b) ☐ objected to by the Examiner.  
Applicant may not request that any objection to the drawing(s) be held in abeyance. See 37 CFR 1.85(a).  
Replacement drawing sheet(s) including the correction is required if the drawing(s) is objected to. See 37 CFR 1.121(d).
- 11) ☐ The oath or declaration is objected to by the Examiner. Note the attached Office Action or form PTO-152.

### Priority under 35 U.S.C. § 119

- 12) ☐ Acknowledgment is made of a claim for foreign priority under 35 U.S.C. § 119(a)-(d) or (f).
- a) ☐ All b) ☐ Some \* c) ☐ None of:
- ☐ Certified copies of the priority documents have been received.
  - ☐ Certified copies of the priority documents have been received in Application No. \_\_\_\_.
  - ☐ Copies of the certified copies of the priority documents have been received in this National Stage application from the International Bureau (PCT Rule 17.2(a)).
- \* See the attached detailed Office action for a list of the certified copies not received.

### **DETAILED ACTION**

1. Examiner notes that Claims 1, 15 & 19 have been substantively Amended, Claims 12 & 18 have been non-substantively Amended, Claims 4 & 17 have been cancelled and no Claims have been added. Claims not explicitly addressed herein are found to be addressed within prior Office Action dated 23 April 2004 as reiterated herein below.

### ***Claim Rejections - 35 USC § 102***

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

3. Claims 1-3, 5, 8, 12 & 14-16 & 18-20 are rejected under 35 U.S.C. 102(e) as being anticipated by US Patent US 6,504,838 B1 to Kwan.

4. Regarding Claims 1, 8, 12, 15 and 19, Kwan discloses a method, apparatus and computer-readable medium for establishing a high-speed modem relay connection over a voice frame network between an originating modem with an associated calling-leg gateway and an answering modem with an associated called-leg gateway, (Col. 87, lines 1-22), the method comprising:

Art Unit: 2143

- first detecting a predefined modulated answer tone at a first voice frame network gateway corresponding with the answering modem, (Col. 66, lines 23 –67; Col. 67, lines 1-31; Col. 69, lines, 30-56; and Col. 87, lines 1-22);
- second detecting a predefined digital code at a second voice frame network gateway corresponding with the originating modem, (Col. 66, lines 23 –67; Col. 67, lines 1-31; Col. 69, lines, 30-56; and Col. 87, lines 1-22);
- suppressing signal transmission between the originating modem, (gateway) and the answering modem, (gateway), (per pending Claim 4), (Col. 67, lines 7-31);
- at the second gateway detecting two additional predefined digital codes from the originating modem and completing local physical layer negotiation, (Col. 66, lines 23 –67; Col. 67, lines 1-31; Col. 69, lines, 30-56; and Col. 87, lines 1-22);
- at the first gateway transmitting at least two additional predefined digital codes to the answering modem and completing local physical layer negotiation, (Col. 66, lines 23 –67; Col. 67, lines 1-31; Col. 69, lines, 30-56; and Col. 87, lines 1-22); and
- enabling signal transmission between the originating modem and the answering modem, (Col. 67, lines 7-31);
- whereby the voice frame network connection is selectively automatically transitioned from voice mode to modem relay mode upon a determination

Art Unit: 2143

that the originating and the answering modem are both high-speed modems, (Col. 10, lines 4-24; Col. 71, lines 54-67; Col. 72, lines 1-67; Col. 73, lines 1-51; and Col. 67, lines 7-31).

Therefore, this reference may reasonably be read to teach or describe every element or claim limitation of Claims 1, 8, 12, 15 and 19.

5. Regarding Claims 2, 3, 14, 16 and 20, Kwan discloses a method, apparatus and computer-readable medium for establishing a high-speed modem relay connection over a voice frame network wherein an amplitude-modulated answer (ANSam) tone is first detected at one of the gateways and a digital call menu (CM) is secondly detected at the other one of the gateways, (per pending Claims 2, 16 and 20), wherein the first gateway to perform said tone-detecting signaling to the other gateway that tone detection has occurred, (per pending Claims 3, 14 and 17), (Col. 69, lines 30-56).

Therefore, this reference may reasonably be read to teach or describe every element or claim limitation of Claims 2, 3, 14, 16 and 20.

6. Regarding Claims 5 and 18, Kwan discloses a method, apparatus and computer-readable medium for establishing a high-speed modem relay connection over a voice frame network wherein negotiating includes: at the calling-leg gateway detecting two additional digital CM codes from the originating modem and completing local calling-leg physical layer negotiation, and at the called-leg gateway transmitting at least two additional digital CM codes to the answering modem and completing local called-leg physical layer negotiation, (Col. 69, lines 30-56 and Col. 72, lines 38-62). Therefore,

this reference may reasonably be read to teach or describe every element or claim limitation of Claims 5 and 18.

***Claim Rejections - 35 USC § 103***

7. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

8. Claims 6, 7, 9-11 and 13 are rejected under 35 U.S.C. 103(a) as being unpatentable over further consideration of US Patent US 6,504,838 B1 to Kwan. Kwan is relied upon for those teachings disclosed herein. As noted above, Kwan discloses a method, apparatus and computer-readable medium for establishing a high-speed modem relay connection over a voice frame network inclusive of voice compression, (Col. 8, lines 18-41), and echo cancellation, (Col. 10, lines 5-67). Kwan does not specifically disclose that after detecting the first tone and before detecting the second tone, enabled voice compression is disabled, (per pending Claims 6, 9, 11 and 13), and enabled echo cancellation is disabled, (per pending Claims 7, 10, 11 and 13), (Col. 8, lines 18-41 and Col. 10, lines 4-67).

9. To incorporate the disablement of voice compression and echo cancellation into Kwan's method, apparatus and computer-readable medium for establishing a high-speed modem relay connection over a voice frame would have been obvious to one of ordinary skill in the art at the time of invention by Applicant. The motivation to combine

is noted by Examiner in that a handshake, (as noted within Kwan), is not an analog to digital conversion, thus there is no noise. Without noise, there is no need for voice compression and echo cancellation, which would only serve to drop bits. Moreover, such disablement functionality is applied within Kwan in regards to the data pump as related to the reception/transmission of messages or fax data signals, (Fig. 21 and Col. 55, lines 52-55). Therefore, Claims 6, 7, 9-11 and 13 are unpatentable over further consideration of the teachings of Kwan.

### ***Response to Arguments***

10. Applicant's arguments filed 23 July 2004, have been fully considered but they are not persuasive. Applicant's arguments do not comply with 37 CFR 1.111(c) because they do not clearly point out the patentable novelty which he or she thinks the claims present in view of the state of the art disclosed by the references cited or the objections made. Further, they do not show how reconsideration avoids such references or objections.

11. Regarding Applicant's assertion that Kwan does not teach signal suppression, Examiner respectfully disagrees citing Kwan, (Cols. 66-71 – particularly Col. 67, lines 7-31), which discloses a data rate negotiation procedure, which procedure includes automatic data suppression during the negotiation process. Examiner further notes that the rate negotiation procedure taught by Kwan inherently includes all modem speeds for purposes of rate matching and suppression as necessary. Moreover, as Applicant notes within the "remarks" section, (p. 8/10) of the Amendment dated 23 July 2004,

Kwan teaches "one type of signal that indicates that the modems are high speed modems", it is clear that Kwan inherently detects high-speed modem signals, which signals, when processed during the rate negotiation procedure, would inherently be suppressed as necessary.

12. In response to Applicant's argument that the references fail to show certain features of applicant's invention, it is noted that the features upon which applicant relies (i.e., "criteria to suppress via acquisition means") are not recited in the rejected claim(s). Although the claims are interpreted in light of the specification, limitations from the specification are not read into the claims. See *In re Van Geuns*, 988 F.2d 1181, 26 USPQ2d 1057 (Fed. Cir. 1993). Examiner further disagrees with Applicant's assertion that Kwan does not disclose voice compression, (Col. 8, lines 26-27), and Echo Cancellation, (Col. 10, lines 25).

13. Thus, as Examiner has completely addressed Applicant's amendment, and finding Applicant's arguments do not show how reconsideration avoids such references or objections, Examiner hereby maintains the original rejection of all claims in their entirety.

14. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

15. A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within

TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.

### ***Conclusion***

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Arrienne M. Lezak whose telephone number is (703)-305-0717. The examiner can normally be reached on M-F 8:30-4:30.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, David A. Wiley can be reached on (703)-308-5221. The fax phone number for the organization where this application or proceeding is assigned is (703)-305-3718.

Any inquiry of a general nature or relating to the status of this application or proceeding should be directed to the receptionist whose telephone number is (703)-305-6121.
